## Recent Projects

**ilovediy:** Ruby on Rails and Backbone.js.

A clone of instructables.com. This app provides people an interface to share DIY experiences. [live](#) [Github](#)

**StarTrek:** Javascript.

A classic Asteroids video game to allow you to fire bullets to kill asteroids. [live](#) [Github](#)

**Snake:** jQuery.

Another classic video game which allows you to feed your snake with apples. [live](#) [Github](#)

**Google-Home:** CSS3, HTML5, jQuery, Javascript.

An exact clone of Google homepage. Click around to see what happens, and check out the "I'm Feeling Lucky" button. [live](#) [github](#)

**Tags:** Javascript, jQuery, CSS3, HTML5

A front-end project for Guzman & Company, which enable users to choose and edit transaction information dynamically. Click the plus sign to see what happens. [live](#)

**Photo\_sorting\_tool:** jQuery, Javascript.

Without jQueryUI, I built my own photo sorting tool. Please drag around the photos and have some fun. [live](#) [Github](#)

**Rails-Lite:** Ruby.

A light-weight version of Rails. [Github](#)

**ActiveRecord-Lite:** Ruby.

A light-weight version of ActiveRecord. [Github](#)
